Ajit Yadav

Software Engineer | Java, Spring Boot, SQL & Data Pipelines | REST APIs, Kafka & Automation

+91 89282 15342 | ajityadav.dev@gmail.com | GitHub | LinkedIn | Portfolio | LeetCode | Mumbai, India

PROFESSIONAL SUMMARY

Software Engineer with 1+ years of experience (including internship) building and supporting data pipelines, backend services and web applications in Java Spring Boot, with Oracle, PostgreSQL and MySQL databases, complex SQL and multi-tenant data models. Experienced in integrating data from third-party and enterprise systems, Kafka-based event-driven pipelines, scheduler-based automation, REST APIs, Git and CI/CD. Careful about data accuracy and reliability, with strong documentation habits and experience collaborating with cross-timezone Agile teams.

SKILLS & TECHNOLOGIES

- **Java & Backend:** Core Java (17/21), Spring Boot, object-oriented programming, REST and GraphQL API design, microservice architecture, multi-threading, complex schedulers, Node.js, Python
- **Data Pipelines & Integration:** Kafka event-driven pipelines, scheduler-based orchestration, third-party SDK and enterprise system integration, high-volume asynchronous data flows, data transformation and validation
- **Databases:** Oracle, PostgreSQL, MySQL, SQL (complex queries and optimisation), schema design, multi-tenant and complex relational data models, Redis, ElasticSearch
- **Automation, DevOps & Cloud:** Git, CI/CD (GitHub Actions, Harness), Docker, Kubernetes, Infrastructure as Code (Terraform, CloudFormation), AWS (Lambda, DynamoDB, IAM), Linux, process automation
- **Testing & Quality:** JUnit, Playwright (E2E and regression), Postman, integration testing, code reviews, root-cause troubleshooting, strong documentation habits
- **Web & AI Tools:** React, TypeScript, Redux, Vue/Nuxt, Tailwind CSS; AI-assisted IDEs for coding, testing and documentation; RAG/LLM exposure; Oracle GenAI & Vector DB certified

PROFESSIONAL EXPERIENCE

Suraj Informatics Pvt. Ltd. – Software Engineer, Full Stack **May 2025 – Present**

- Built event-driven **data pipelines** with **Apache Kafka** and scheduler-based orchestration to move high-volume asynchronous data between enterprise services, built for reliability and scalability.
- Integrated data from **third-party and enterprise systems** into CRM, ERP, TMS, DMS and Port Management platforms using **Java Spring Boot** and Node.js services.
- Wrote and optimised complex **SQL** queries across Oracle, PostgreSQL and MySQL and designed multi-tenant schemas for complex data models, improving performance and treating output correctness as a hard requirement.
- Developed, maintained and supported web applications and **REST APIs** (React frontends, Spring Boot/Node.js backends), providing ongoing maintenance and technical support.
- Automated delivery with **Git**-based workflows and **CI/CD** pipelines (GitHub Actions, Harness); wrote **JUnit** and Postman tests and took part in code reviews to keep quality high.
- Troubleshot cross-service issues across APIs, databases and frontends, communicated root causes clearly, and documented API changes for team-wide knowledge sharing.
- Worked in Agile/Scrum sprints (planning, estimation, stand-ups, retrospectives) with developers, product owners and project managers; used AI-assisted tools for test generation, debugging and documentation.

GAOTek Inc., New York – Full Stack Developer Intern (Remote) **Mar 2024 – Sep 2024**

- Built Node.js REST API backends integrated with ReactJS components, applying async patterns and handling edge cases to ensure output accuracy and stability.
- Maintained technical documentation for all delivered features; collaborated in an Agile, cross-timezone team using Git branching and code reviews.

KEY PROJECTS

- **RealTime Analytics Platform:** Analytics backend integrating multiple real-time data sources with live monitoring over Kafka event streams, built for correctness, reliability and scalable deployment.
- **Ticket Management ERP (SaaS):** Multi-tenant ERP with role-based access control, a typed REST API backend, a React frontend and an optimised relational schema.
- **QuickRAG (AI Document Pipeline):** End-to-end pipeline covering PDF ingestion, text chunking, embedding generation and vector retrieval, demonstrating data processing and AI-integrated API design.
- **ASCII Folder Tree Generator:** Full stack utility with a React frontend and REST API backend, owned from design to delivery.

EDUCATION

BS – IT & Computer Science | University of Mumbai – GSCC | CGPA: 8.30 **2021 – 2024**

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:** Oracle Cloud Infrastructure (GenAI & VectorDB), Postman API Fundamentals, HackerRank Java & SQL, CNSP (SecOps), ManageEngine MECPA, JPMorgan Cybersecurity Virtual Internship.
- **Competitive Programming:** LeetCode 150+ problems solved, HackerRank 5★ Java, CodeChef 2★, Codeforces 2★.
- **Hackathons & Community:** AI Amplifier, MumbaiHacks, EthMumbai, LeetCode Contests; BrowserStack Core Team; active open source contributor.
