

Ajit Yadav

Software Engineer – Full Stack | Node.js & Backend Specialist

+91 89282 15342 | ajityadav.dev@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | [LeetCode](#) | [Medium](#)

Career Objective

Full Stack Software Engineer with 1+ year of professional experience building scalable backend microservices. Skilled in building scalable, secure integrations with strong focus on code quality, peer code reviews, debugging, and compliance. Familiar with IAM concepts including identity governance, access management, and security compliance. Eager to contribute to SCIM connector development and identity security solutions in an enterprise IAM environment.

Skills & Technologies

Backend & Languages: Java, Spring Boot, REST APIs, SCIM Protocol (conceptual), Microservices, OOP, MVC

Asynchronous & Event-Driven: Kafka, Async/Await, Promises, Event Loop, Scheduler Automation

Frontend: ReactJS, HTML5, CSS3, JavaScript, CSS Pre-processors (SASS/LESS)

Databases: PostgreSQL, MongoDB, MySQL – schema design, query optimisation, multi-source integration

Architecture & Design: MVC, OOP, Functional Programming, Microservices, Scalable System Design

DevOps & Tools: Git, AWS, Docker (learning), Postman, Agile/Scrum, VS Code, IntelliJ

Security & Compliance: OWASP awareness, Information Security (CNSP), Static/Dynamic code analysis

Professional Experience

Suraj Informatics Private Limited

May 2025 – Present

Software Engineer – Full Stack

- Built scalable backend microservices using Node.js, Java, Spring Boot, Python, PostgreSQL & Kafka across CRM, ERP, TMS, DMS and Port Management systems; handled event-driven and async workflows.
- Designed REST APIs, implemented scheduler-based automation, optimised SQL queries and created database schemas to represent and support complex business processes.
- Performed unit testing and pre-QA validation; enforced coding standards through code reviews to ensure quality, security compliance, and on time delivery. Contributed ReactJS frontend integration

GAOTek Inc.

Mar 2024 – Sep 2024 (7 months)

Full Stack Developer Intern (Remote – New York Based)

- Developed ReactJS components with Node.js backend integration; applied async JavaScript, Git version control, and Agile practices within a cross-timezone team.

Projects

Ticket Management ERP (SaaS): Multi-tenant ERP on MVC architecture with role-based access, REST API backend & business-process schema design.

RealTime Analytics Platform: analytics dashboard with real-time monitoring, cloud-ready, scalable design.

QuickRAG (AI-Powered Document System): PDF upload + chunking/embedding pipeline integrating multiple data sources into a unified retrieval system.

ASCII Folder Tree Generator: Full-stack web utility.

Education

BS – Information Technology & Computer Science | University of Mumbai | CGPA: 8.30

2021 – 2024

Certifications & Achievements

Certifications: CNSP (SecOps), ManageEngine MECPA (Cybersecurity/IRM), Oracle Cloud Infrastructure (Gen AI), Postman API, JPMorgan Cybersecurity Simulation, HackerRank Python & SQL

Competitive: LeetCode 150+, HackerRank 5★ Java, CodeChef 2★, Codeforces 2★
